

Translution Quick-Start Guide

The following is a quick start guide for installing, registering, activating and starting to use your Translution Product. There are four steps you need to complete:

- Step A: Registration
- Step B: Installation
- Step C: Activation
- Step D: Start to Use Translution

Note: This quick start guide covers all the basic steps to get you up and running with your Translution Product.

STEP A: REGISTRATION

In order to download your Translution Software, go to www.translution.com/download.aspx and click to download the product. Follow the instructions for registration. Registration is free and no credit card details are required.

Once registered, you will be sent two emails. The first email will confirm your registration details, including your user name and password. This information is required to access Translution's website to request support. The information is also required should you wish to change any of your personal information, such as your password. The second email will include an activation code for the product.

STEP B: INSTALLATION

1) Pre-installation checks

Check that you have no Microsoft Office applications (Word, Outlook, Internet Explorer) running on your system.

2) Unpack the software

- Go to the location of the downloaded file, TranslutionSetup (.exe file).
- Double-click on this file name and Click on the **Next** button when the dialog box appears. This will start the installation process.
- Follow the prompts on the Translution Installation Program. When asked to select the setup type, choose **Complete**.
- When installation is complete, click on **Finish**.

On installation there may be a delay whilst the Translution installer checks your system for existing installed software.

NOTE: The installation process will check to see if you have Microsoft .NET Framework 2.0 installed on your system. This package is required to run all applications developed using Microsoft's .NET. If it is not installed, then the installer will either, install .NET Framework 2.0 directly from the setup file, or if not present in the setup file, start downloading the .NET Framework 2.0 from the Microsoft Download Website, and then continue installation. Please note that this may take some time.

d)

STEP C: ACTIVATION

Follow these steps to activate your Translution software:

- Go to **start, Programs, Translution, Activation**.
- Enter and confirm your email address.
- Enter or copy and paste the activation code you have received into the dialog box.
- Click on the **Activate** button.

Please contact our support team if you need further assistance. This can be done by logging into your Translution account and requesting support.

Congratulations! You can now start to use Translution

STEP D: START TO USE TRANSLUTION

Please navigate to Start -> Programs -> Translution -> Translution Control Centre and follow the on screen prompts. There are detailed help files available within the Translution Software, please click the help button on the relevant screen.

NOTES

Note 1: Check your list of installed software. Go to **Start**, (Settings), **Control Panel, Add or Remove Programs**. If Microsoft .NET Framework 2.0 is not installed, then please download it and install it.

Note 2: If you have Spam blocking or filtering software that requires confirmation of acceptable email addresses, then you will need to add 'translation@translution.com' and 'admin@translution.com' into your Spam software's acceptable email address list to enable use of the translation service.

FINAL NOTE: If you are have any problems with your Translution installation and setup, please check the [FAQs](#) on the Translution website and if you are still having problems then contact [Translution Support](#).
