TransLution™ Software Manufacturing Processes

Start your journey to Manufacturing Efficiency

Manage your manufacturing processes accurately and effortlessly.

www.translutionsoftware.com

TransLution Software offers standard, ready-to-use functionality designed to expedite your implementation process while keeping costs in check. This quick, cost-effective solution helps you get up and running with minimal time and resources, coming pre-configured with standard functions, labels, documents, and reports.

At TransLution, we understand that many production processes are unique, which is why we've also designed our software to be fully configurable. Our software allows you to create tailored solutions that precisely address your specific manufacturing requirements, whether it's ensuring precise material tracking, waste management, or accurate labor monitoring.

WIP MATERIAL TRACKING

WIP LABOR TRACKING

"Previously we bought a product that was rigid and un-configurable, and we were fast outgrowing its limited functionality. We started our journey with TransLution using its standard functionality, and as our needs have grown, TransLution has effortlessly adapted and grown alongside us. By leveraging TransLution's significant capabilities we have expanded its use into areas of our business that were not initially on our radar."

WIP Material Tracking

The key features of TransLution's WIP Material Tracking Module are:

- **Job Issues:** Directly issue stock to a job using a handheld device.
- **Job Receipts:** Receipt stock as it is produced with a simple scanning process.

"Average of 5% increase in production when starting to measure OEE's."

WIP Labor Tracking

The key features of TransLution's WIP Labor Tracking Module are:

- **Data Logging:** Operators can effortlessly start and stop work in real time from the factory floor. Different types of work logs can be captured, accounting for breaks and downtime.
- **Reporting:** Gain insight into your operations by tracking your operators and monitoring their tasks in real-time. Review detailed time logs and seamlessly post this information to Syspro, ensuring your data is always up-to-date and accessible.

"Increased production by 30+% by identifying and removing lost production time."
